PAST

Morphing the mundane into something beautiful has been our passion since 1972 when we started manufacturing decorative cabinet handles, knobs, security door chains, and door stoppers by utilizing our in-house capabilities of casting, machining, powder coating, electroplating, and packaging. Having been immersed in a culture of crafting hardware that's gorgeous in its functionality, the second generation embarked upon a new enterprise of creating modular, stainless steel railings with an aesthetically pleasing slant. Thus, in 2005 VIVA Railings was born.

PRESENT

For the eighth **year in a row**, VIVA Railings has been ranked on Inc. 500|5000 list of Fastest Growing American Companies! We primarily rely on organic growth and are consistently developing our products to better serve our valued customer base of owners, architects, and contractors. Our headquarters are based in the DFW Metroplex at our brand new facility in Carrollton, Texas. We are proud to state that all of our stainless steel products are LEED, HUB, SBE, and MBE certified and are comprised of a minimum of **65% recycled content**

FUTURE

Our goal is to be the company of choice for our valued clients (**owners, architects, designers, and contractors**) by providing stunning, safe, and **sustainable railings** at an affordable price. Thus far, we have prided ourselves on leaving our clients not just satisfied but delighted with our products and service. We aim to continue on that same path to ensure an impeccable experience from start to finish with our clients. We are focused on providing beautiful products for **outstanding architecture across the USA**

Goals & Results

Our objective is to provide end-users with affordable, superior quality products. Choices include the range of **modular products** shown on our website, along with custom fabrication for special requirements. We will not compromise on safety, quality, or customer satisfaction.

We have gained the trust of customers from Miami to Boston, El Paso to Seattle, and Puerto Rico to Hawaii. We have worked on an international project in the British Virgin Islands, Curacao, the Bahamas, India, and the United Arab Emirates (Dubai). Visit our **projects gallery** to see photographs of our installed projects.

We continuously develop new designs to allow **architects, designers, owners, and contractors** more choices and innovative new expressions for their impressive commercial projects. Utilizing our alliances with suppliers and installers throughout the country, we work with our clients as a trusted partner to ease the process of completing a commercial project.

Don't forget to **follow, like** and **subscribe!**

TESTIMONIALS

We specified Viva's stainless-steel Cube railing system – glass panel and multiline – for a large exterior restoration project at a pair of residential buildings in New York City. The 2009-10 project was challenging and Viva worked

Prior to working with VIVA, I had no concerns which prevented me from choosing VIVA Railings, and what surprised me the most was the delivery time and I was very happy with the caliber of work! VIVA railings is a

Thank you for the excellent work your team did at the UCT Vertical Expansion buildout. The stair railings were expertly installed and highlight the central features of the building. When we had a few misc.
