**What every breeder needs to know about weaning puppies and caring for nursing dams!**

Weaning is challenging even for seasoned professionals.

There's no one right or wrong way, and there are always different issues that can arise.

This online course teaches you how to wean your puppies and care for your nursing dam with less stress and less risk (for them and you!)

You can learn ahead of time, or in real-time when you have puppies.

Each month we help a new group wean their puppies as they are ready.

### Course contents include

- The top mistakes breeders make when feeding nursing dams and how to avoid those
- Learn the most common nutritional deficiency in lactating dams that can determine whether or not she can nurse her puppies properly
- What you don't know about dog food and how that can make or break your nursing dams and weaning puppies.
- How to avoid blown coats, milk production issues, and dams becoming depleted
- The scoop on poop: Discover little known information about poop (yes, poop!) and how you can use that info to help your puppies and mamas

- What you need to know about when and how to wean puppies and how to avoid potentially dangerous or even deadly pitfalls
- How to take care of your dam during weaning—most weaning instructions focus on the puppies, but it can be a very stressful and challenging time for the dam and she deserves the best care possible
- How to know if your dams and puppies are getting enough or too much food
- Proven recipes for your dams and puppies
- The truth about probiotics and supplements and how to evaluate those yourself (plus we give recommendations)
