

Contact Tracing

Reassure your team with WorkSafe's Contact Tracing

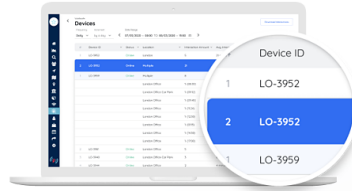

Contact tracing that reassures office workers

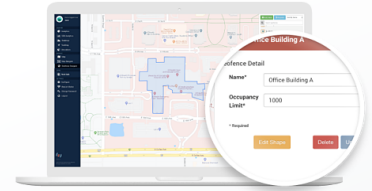

For use in the office

Reassure the team with a contact tracing app for when in the office

Trace anonymously

Anonymously trace and notify those near a co-worker who tests positive

Simple to set up

Get started with the WorkSafe app and dashboard in a few easy steps

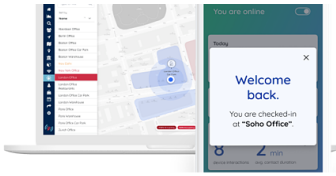

How it works

1. An app that's on when in the office

2. Employee uses Anonymous ID to notify employer if positive

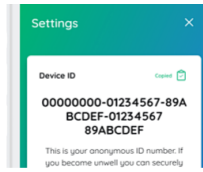

3. Contacts anonymously traced and notified

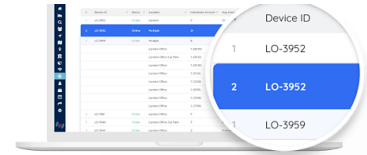

Employees run app when in the office. In control of when contact tracing is on and off. Phone to phone detection of which near to.

Automatic check-in and check-out from building and setting of office hours available.

If an employee tests positive, they give the anonymous ID generated in the app to their employer (not via the app).

"Your anonymous ID number is LO-1354"

Employer uses WorkSafe dashboard to anonymously notify those phones that were near a co-worker who notified that they tested positive.

"Hello, this is to notify you that someone who was near your phone in the office has reported positive."
