EAGLE MOUNTAIN

PET FOOD™

The bond with our dogs is pure and simple – they are a best friend whose love is unconditional. Choosing their food should be simple too. Eagle Mountain Pet Food provides the complete nutrition your dog needs at a price that just makes sense.

PRO BALANCE is an excellent choice for dogs of any life stage or activity level. Backed by advanced science and fortified with nutritionally complete ingredients, this multi-protein formula promotes healthy activity, and helps support a strong immune system and healthy digestion.

PREMIUM NUTRITION

- Ideal for normally active dogs of all sizes and life stages.
- Made with gluten-free ancient grains.
- Fortified with vitamins, minerals, essential fatty acids, and amino acids.
- Helps support healthy immune and digestive systems.
- Nutrient dense recipe made with premium-quality beef and turkey meal.

RECOMMENDED DAILY FEEDING GUIDE FOR ADULT DOGS

CALORIE CONTENT (CALCULATED): ME 3503 kcal/kg, 372 kcal/cup

WEIGHT (in Lbs)	5	10	15	20	30	40	60	80	100
DAILY AMOUNT (in Cups)	1/2	7/8	1 1/4	1 5/8	2 1/8	2 2/3	3 5/8	4 1/2	5 1/4

Increase feeding intake by 1/2 cup for every 20 lbs. over 100 lbs.

Amounts are recommended for adult dogs with moderate levels of activity and no adverse weather conditions. These are guidelines and should be adjusted as needed to maintain optimum body condition.

Schedule regular veterinarian checkups for optimum health of your animal.

Keep fresh water available at all times.

Store in a cool, dry place.

TRANSITIONING FOOD

FEEDING TIPS - CHANGING DIET: When changing to Eagle Mountain Pet Food, we recommend slowly transitioning over the course of 7-10 days. Every few days, gradually increase the amount of this Eagle Mountain Pet Food formula as you feed less of the previous food.

FEEDING PUPPIES: Puppies will typically start nibbling moistened dog foods at 3 to 4 weeks of age. Feed as much as the puppy will eat in 20 minutes in 4 feeding intervals spaced throughout the day. May be mixed with water, broth or milk at a ratio of 3 parts food to 1 part liquid. To ensure product freshness, do not leave moistened food out for more than 30 minutes. Puppies will be weaned from milk by 3 weeks of age. Continue to feed up to 4 times per day. Within a few months, the puppies may be transitioned to a self-feeder. After age one, feed to maintain good body condition, using the feeding chart as a guide.

PREGNANCY AND NURSING: Energy requirements continually change during stages of gestations and lactation and may require up to four times recommended levels of intake. Adjust amount of food provided to maintain good body condition of your female dog.
