

## OVERVIEW, CLARITY, VISION

Technology management can be complex. That is why we developed TESMA, an application that provides an intelligent interface between the commercial and technical spheres that many departments in your company will benefit from. TESMA provides a central database for all key business information and makes it available in real time. This creates transparency.

TRANSPARENCY IN DAILY TECHNOLOGY MANAGEMENT

### SUPPORT FOR ALL PHASES

Whether printers, smartphones, laptops, or even forklift trucks, you need a complete and consistent solution to manage your equipment efficiently. TESMA provides support for all phases of the product lifecycle at the click of button – and in real time. The software makes flexible administration, financial control, and accurate reporting possible for all technologies, and is a valuable decision-making tool for your daily technology management. TESMA also improves process efficiency within organizations, which means savings on your overall process costs are a given.

### TESMA - one system for all data
