The screenshot shows a computer monitor displaying the Mosaic software interface. The interface is divided into several sections. On the left, there is a file explorer showing a folder named 'Mosaic' containing a sub-folder 'E1' and a file 'Rd3_Combis_Mosaic_Input.fa'. A red arrow points to the 'Mosaic' folder. The main area of the interface displays four charts: 'FIOP' (416 variants), 'Mutation Frequency' (27 mutations), 'Incorporation Rate', and 'Duplicates'. The 'FIOP' chart shows a distribution of variants across different categories. The 'Mutation Frequency' chart shows the frequency of mutations. The 'Incorporation Rate' chart shows the rate of incorporation for different mutations. The 'Duplicates' chart shows the number of duplicate variants. Below the charts, there is a table titled 'Variance Inflation Factor (VIF < 5)' with columns for 'Mutation' and 'VIF'. The table lists several mutations: A1T, A2T, A3T, A4T, A5T, A6T, A7T, and A8T, with their corresponding VIF values. The VIF values are mostly 'NA' (Not Available), except for A1T which is '0'. The bottom of the screen shows a Windows taskbar with various application icons and a system clock indicating 7:52 PM on 5/6/2020.
