ARCH Cutting Tools is ***your complete tool making authority***. ARCH does this through blending our customer service associate's strengths with the commitment of 350,000 square feet of American manufacturing that provides the innovation to support the breadth of in-stock Standards for quick shipment at our all new Midwest campus. It is no coincidence that ARCH leads the industry in custom engineered tooling solutions, it was intentional.

The cutting tool heritage of KEO has evolved over the past 80 years to include Micro Tools, Milling Cutters and in the last decade the Patriot High Performance cutting tool line, making ARCH Cutting Tools, the most trusted American source for the multitude of industry machining needs that we service. Building on this, the broad portfolio of the Ultra-Dex indexable product line supports strong manufacturing solutions in tool holding, indexable milling, boring, turning, threading, grooving, and hole-making. Adding to the pillars of strength is the ability to collaborate with the customer to enhance process and profitability with our engineered custom tooling solutions through ARCH Specials, from solid round, indexable, and PCD tipped to complex multi-function tools. With this revolutionary cutting tool source and over 400 years of engineering know-how, ARCH Cutting Tools provides the best service and solutions in the cutting tool industry!
