IT Managed/IT Services

- Network Architecture
- Desktop Services
- Private Cloud Deployment
- Business Continuity Planning

Wiss & Co. provided awesome support during our company implementation of the AvidXchange software. In the beginning stages of the implementation, I had lots of questions about the software, Wiss, particularly Kendy Nguyen, were always very helpful with answering all of my questions. They also researched the reports needed to find payment information as well as solving any issues we had with the software. They provided all-around excellent support.
