Control Voltage

24VDC (Optional 120VAC)

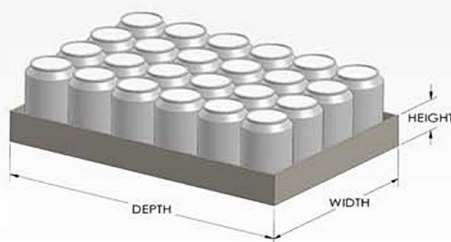

Speed Range

Up to 12 Cartons Per Minute

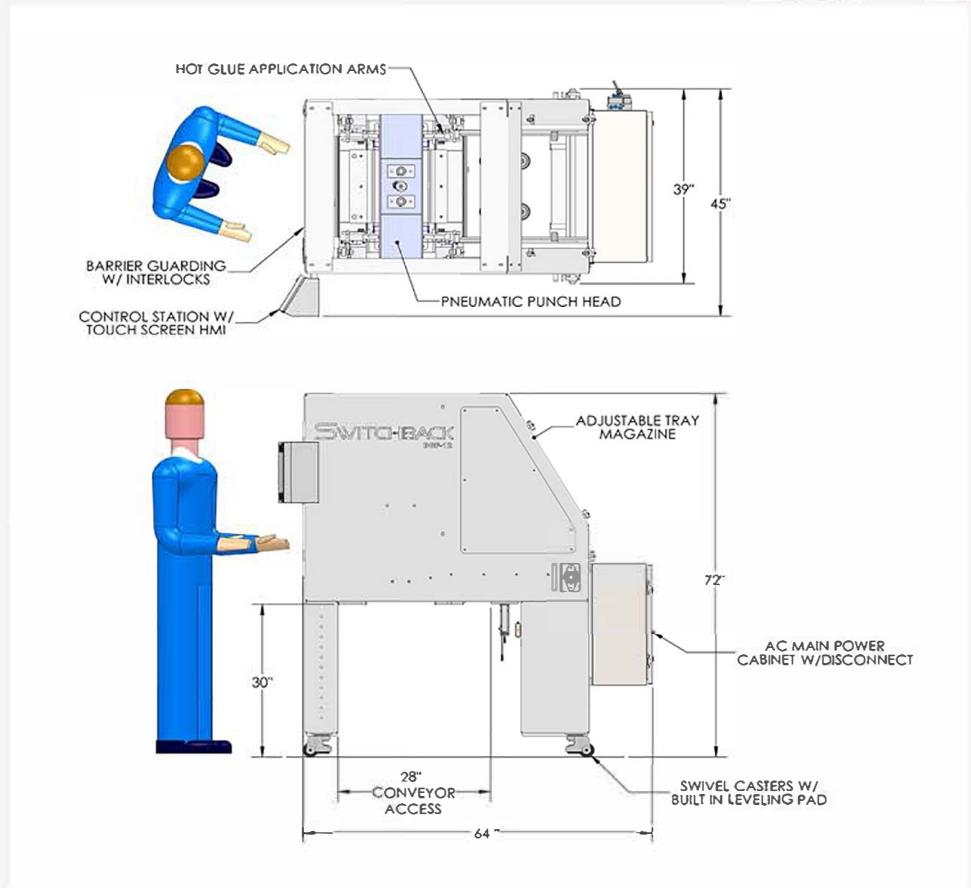

Air Consumption

30 CFM @ 80 PSI

Tray Style

BGF-12

Designed to Perform

The BGF-12 is designed specifically for craft brewing trayforming requirements. By reducing hand-erected tray sizes, and reducing labor costs at a very cost effective price, the BGF-12 can help any brewery or similar industry automate their operation of erecting corrugated trays.

With a small footprint the BGF-12 will fit in almost any floor space, and it's integral casters allow for easy removal when not in use.
