

The central nervous system is one of the most complex biological pathways.

Pharmacological approaches to neuropsychiatric and neurological treatments have many challenges.

OLD PARAD IGM

We approach the brain like a blunt engine, flooding it with chemicals.

**Blunt
Approach =
Blunt Outcome**

NEW PARA DIGM

Dandelion is looking at the brain as a data processing engine. By targeting the data pathways, we have the potential to reimagine the way we treat the brain.

**Targeted Approach =
Targeted Outcome**
