

When You Control Your Health Data, You Control Your Options.

Citiizen helps you collect, summarize, and share your medical records digitally, **free of charge**. You can use it to get a second opinion, coordinate with caregivers, or donate to research.

Starting with cancer, we are helping patients take control of their health outcomes.

“ Getting my records was so difficult, it was easier to repeat the tests for every new provider I saw.
TAMILA
Diagnosed with breast cancer, May 16, 2016

Your experience. Frictionless.

Simply upload your health documents, and Citiizen will transform your data into an organized profile, ready to be shared with whomever you choose.

Collect

Directly upload your personal health data to your Citiizen profile, or we can get it for you.

Organize

Your health documents are summarized into a single, organized digital profile.

Share

Your health history is available for you to use and securely share with whomever you choose.

Your data. Your options.

Your health information is the key to your care. Harness your comprehensive data to access a wider range of choices.

Second opinions

Easily share your Citiizen profile with doctors and caregivers to find the right treatment for you.

Share with loved ones

Keep friends and family members up to speed with current medications, treatments, and procedures.

Contribute to research

Share your Citiizen profile with researchers for access to clinical trials or donate your personal health data to help find a cure.
