

## NOVISYNC® | THE INDUSTRY LEADER IN DATACENTER MIGRATIONS

[← Back](#)

Our consultants have performed tens of thousands of migrations for over a decade, as key contributors, delivering some of the most complex migration projects in datacenter history. We have the best global talent available, including US-based resources, with decades of combined experience delivering projects in some of the world's biggest IT environments. The Novisync® process has been tempered and polished into the following services, which are results-based (fixed fee), priced by workload count, and project duration.

### **P2V™ | Physical to Virtual Migration Services**

Novisync® specializes in decoupling Linux and Windows-based Operating Systems from physical hardware, converting them Virtual Machines (VMs), while migrating them onto your preferred virtualization platform. Our staging, execution, testing, and validation tools and processes are 2nd to none, with the highest rates in conversion quality and availability.

### **V2V™ | Virtual to Virtual Migration Services**

Whether it's rack-to-rack, site-to-site, or cloud-to-cloud migrations of virtual workloads, Novisync® has mastered all the industry tools to meet the project deadlines. Whether it's hot or cold migrations, we are laser-focused on workload volume, conversion quality, and availability.

### **X2V™ | Anything to Virtual Migration Services**

Adopting the new hybrid/multi-cloud model?  
Ready to consolidate data centers?  
Need a high-priority datacenter evacuation?

Let us handle the operational requirements and technical delivery of your entire migration project with the complete package, strategic and tactical execution, from start to finish, which includes:

- Project Charters & Workplans
- Risk Assessments w/ Action Items
- Change Control Scheduling
- Advanced Analytics w/Automated Project Tracking
- Quality Assurance & Reporting Dashboards

### **V2C™ & VM2C™ | Virtual Machine to Container Migration Services**

Ready to adopt the resource efficiency of containers but not sure where to start?

Novisync® can get you started with a containerization strategy and implementation that includes: technical education and training, product selection, as well as conversion assistance for multiple virtualization and container tools. Allow us to be your guide into the new era of containers through all phases of implementation: Proof-of-Concept (POC), Pilot, and Production.
