## Turnkey installation from experts keeps your facility running smoothly

MSI installation crews are skilled experts who function independently of client personnel. Focused solely on labeling, work can be completed in half the time of other methods or contractors in a safe reliable manner.

- MSI's single focus is on proper line labeling. Our installers' sole responsibility is labeling—and they work continuously until a project is complete.
- Our installation crews have extensive safety training and are provided with the best equipment to ensure that a project is completed safely.
- Our personnel have the experience and understanding of where pipe labels and valve tags are best placed to provide visibility for facility operators and maximum value to customers.
- Special attention is paid to the unusual or difficult-to-reach areas of the plant. Pipe racks, manifolds and valve locations are emphasized so that line tracing by operators is simplified, both on a day-to-day basis and in the event of an emergency. We come to the job prepared with the necessary lifts, tools and equipment to complete installation in areas that other contractors or in-house personnel typically would not easily have access to.
- Since MSI manufactures the pipe labels and valve tags as well as installs them, we have complete control over the installation schedule. If additional markers are required, they can be quickly manufactured and installed without delay. Often, changes or punch list items can be taken care of immediately.

MSI turnkey installation systematically installs permanent asset identification without customers devoting personnel time or providing direct supervision. When installation is attempted by plant operators it's done on an "as time is available" basis which proves to be extremely inefficient and never results in a complete, satisfactory effort. MSI crews are experts at installing pipe labels and valve tags that enhance operator training, improve process safety management, and eliminate the need to trace lines between rooms and floors.
