

UAS Drone Services

Valmont Utility offers advanced unmanned drone aerial inspection services for inspection of inaccessible, hazardous, or dangerous infrastructures, assets, and locations. There are numerous industries, such as oil and gas, communication, power generation, infrastructure and many others that have assets that require risky and life-threatening maneuvers for access. Valmont Utility's UAV drone inspection services enable efficient inspections of hard-to-reach places and structures.

Valmont provides non-destructive techniques such as magnetic particle inspection, dye penetrant, or ultrasonic inspection techniques for accurate and high-quality inspections. We use our revolutionary drone technology with our trained and certified drone operators to perform excellent inspections. Our unmanned UAV drone aerial inspections offer a perfect alternative to traditional infrastructure inspections, disaster relief, environmental monitoring, and turnaround planning.

Why Valmont Inspection Services

Valmont Utility is one of the leading companies that introduced the use of a drone system to carry out inspections in various industries. We have introduced safe, cost-effective, and innovative drone technology to inspect both outdoor and indoor equipment, identify defects and issues, take aerial views of disaster and catastrophic sites and support repair and maintenance of key infrastructures and assets. Unlike other drone service providers, we work with trained and certified UAV drone pilots who hold FAA certifications. We stay updated with the changes in industry standards to deliver better value over traditional inspection methods.

- Much better value over traditional inspection methods
- Above Industry Standard Qualifications
- Save you plenty of time and money
- Go where other inspections can't
- Eliminate life and safety risks
- Multiple inspection points (ie: reports after images taken * if wanted)

Saving Time and Money with Drone Inspections

By harnessing the power of our advanced drone inspection services, you can save a significant amount of time and money. Drone inspections make it easier and quicker to reach heights and inaccessible areas without the need of expensive equipment. It also improves the efficiency and accuracy of the initial screening process and can use specialized hi-tech equipment to inspect the environment and assets. It is possible to do all this and much more with speed, cost-savings and safety if you choose drone inspections.

Corrosion Protection

Whether it's an above ground option like hot-dip galvanizing or weathering steel, or TriFORCE™, the industry's best below grade barrier protection, Valmont Utility offers corrosion protection for any environment.
