Analyst1 – A New Breed of Cyber Threat Intelligence

Analyst1, engineered by analysts for the enterprise, provides a threat intelligence and network defense platform to clarify malicious activities threatening an enterprise.

Intelligent Cyber Threat Response

Cybersecurity professionals know there are fundamental gaps in most cyber operations centers, one of which is the overwhelming level of effort required to understand cyber threat information.

The Coronavirus, Cyberthreats and the 2020 U.S. Election

The outbreak of Covid-19 has had a devastating impact on the world not only from a health perspective, but economically as well. And now, the United States is facing an election where those health concerns could impact the voting process as well as the security and integrity of the election itself.

Why Analyst1?

Analyst1 offers organizations a more efficient method of gathering and enriching threat intelligence

Inundated with various security tools, analysts rarely have time to investigate and remediate all threats. Analyst1 eliminates labor-intensive tasks required to understand which threats matter most. Built by analysts for the enterprise, Analyst1 allows the ability to author, test and deploy effective countermeasures across multiple intrusion detection and prevention systems.
