- BAMBOO WOOD CONSTRUCTION- This cutting board is made of bamboo wood. Bamboo is famous for being a very hard wood. It gives off the look of a tree wood even though it is made from grass. It is also very ecologically-friendly and provides a beautiful wood aesthetic.
- JUICE DRIP GROOVE- This wood cutting board comes with a juice drip groove all around it. This helps catch any water or juice that may drip from fruits, vegetables or even meats so that your meal remains fresh and palatable.
- EXTRA LARGE SIZE- This large cutting board measures 16" x 12" x 1" and is very thick. It is big enough to withstand large and heavy meats like a whole turkey for Thanksgiving and well as stand up to the demands of everyday cooking.
- NON-SLIP HANDLES- The bamboo cutting board comes equipped with non-slip handle grips on the edges to make it easier to lift the board and make it easier to carry around. This ensures that none of your ingredients or food will fall during the cooking process.
- MULTIPURPOSE KITCHEN TOOL - This chopping board is a truly multipurpose tool and can be used to chop all types and sizes of fruits, vegetables, meats, bread, and even different types of cheese. The board is so beautiful that you can use it as a cheese board!
