

Our Services

With a thorough understanding of quality and fully comprehensive capabilities, BioStem Life Sciences is highly qualified to lead clients through the complex and fruitful process of bringing new and exciting products to market.

From the very beginning, we can guide you through the infancy of your product development plans, all the way to final regulatory approval. Our team of skilled and seasoned project leaders will work closely with you to develop a product plan that meets your needs. Utilizing our expertise in both process development and quality, we can translate your idea or bench-top process into a fully scalable manufacturing process.

Expertise in Both Process Development and Quality

Microbial Products

Microbial cell banking, plasmid DNA, recombinant proteins (e.g., vaccine antigens), microbial cellular therapeutics.

[Learn More](#) →

Cell Therapeutics

Cellular therapies including human embryonic stem cells (hESCs), mesenchymal stromal cells (MSCs), neural progenitor cells (NPCs), mammalian cell banking.

[Learn More](#) →

Mammalian Products

Gene therapy vectors (adenovirus, AAV, lentivirus), viral vaccines, and recombinant proteins including monoclonal antibodies in mammalian expression systems (e.g., CHO, HEK-293, MRC-5, Vero cell lines).

[Learn More](#) →

Aseptic Finish/Fill

Liquid aseptic fill including recombinant proteins, gene therapy vectors (DNA, viral vectors), and small molecule drugs.

[Learn More](#) →

Process Development

Full support for clinical process development including microbial fermentation, cell culture, research cell banking, and downstream processing for recombinant proteins, plasmid DNA, and viral vectors/vaccines.

[Learn More](#) →

Quality Control

Comprehensive product testing and analytical methods development / qualification / validation to support process development and cGMP release testing.

[Learn More](#) →

Quality Assurance

BioStem Life Science's range of product development services, expertise in perinatal tissue processing, and flexible business model separate us from standard CDMO companies in the biologics space. Our contract development and manufacturing services are built on a firm commitment to quality.

[Learn More](#) →

Regulatory Affairs Support

BioStem Life Science's range of product development services, expertise in perinatal tissue processing, and flexible business model separate us from standard CDMO companies in the biologics space. Our contract development and manufacturing services are built on a firm commitment to quality.
