Do more, faster than ever

One gig is equal to 1000 Mbps.

Kinetic GIG Internet is one gigabit per second (Gbps), which is the equivalent of 1,000 Mbps. In other words, it's ten times faster than 100 Mbps Internet. Plus, it uploads as fast as it downloads. One-gig speed lets you do almost anything – download or upload huge files in seconds, stream instantly and use multiple devices at the same time.
