Skilled Trades Education and Career Exploration for Schools and Career Groups

Do you offer a program for middle or high school students that focuses on career exploration and life skills?
If you do, consider a partnership with Isaac Training & Education Center (ITEC).

Located in Upstate New York in Rochester, our dedicated ITEC lab is an impressive look into the actual equipment HVAC technicians work with. We also have lab space for plumbing, electrical, construction trades, and more.

Your partnership with ITEC affords your school or group:

- Tours of the ITEC facility and lab
- Access to experts for events at your school
- Information about the HVAC industry
- Career exploration field trips
- Possible sponsorship opportunities
- Guest speakers for Parent Night, Career Night, and Tech Night

If you have an idea of how you would like to include ITEC, we would love to hear it! We are committed to education and strongly support the school districts in Upstate New York.

Contact Aubrey Marrero at (585) 546-1400 ext. 7406 or Recruiting@IsaacHeating.com for more information on how your organization can partner with ITEC.
