## STYLISH

I bought this backpack initially just to carry my things boating. I love the cup holders on the side. I have used the backpack for far more than boating. It's comfortable and stylish.

**Yes, I recommend this product.**

## GREAT BAG BUT TOO SMALL

A little bit small. They had the perfect size going with the Tocayo. I wish they'd bring a larger backpack because I had to send the crossroads back to Amazon, and then when I found a Tocayo on amazon, I had to send it back because it was a fake. Ended up going with a Goruck (which is awesome but expensive. Found mine on a really good sale) because of that. Make a bigger backpack please. I like Yeti but you guys didn't provide this time

**Yes, I recommend this product.**

## PERFECT BACKPACK!

Great quality! It feels like it was last forever. The padded computer pocket fits my 15 inch laptop perfectly. Pockets are well thought out and perfectly placed for everyday use. The bag is very comfortable and looks great. I love the magnetic rambler pockets on the outside as opposed to the previous model backpack with these inside. It's literally the perfect backpack for me. I don't see it getting any better than this. Steep price but you get what you pay for.

**Yes, I recommend this product.**
