

ZERO FALSE POSITIVES. ZERO PATIENTS HARMED.

We are proudly partnering with US hospitals and healthcare workers in their mission to eliminate the preventable error of blood culture contamination and together set a new, and safer, national benchmark for blood culture contamination.

together set a new, and safer, national benchmark for blood culture contamination.

+

WE PROMISE

to provide you with the essential technology, training and tracking assistance to serve your team with the unparalleled support needed to accomplish this mission.

+

YOU PLEDGE

to a team commitment to achieve diagnostic excellence. Every individual's dedication is critical to help prevent the risk of patients experiencing a misdiagnosis of sepsis.

HEAR FROM OUR PARTNERS

Once in a lifetime, Infection Preventionists have an opportunity to really make a difference in the lives of their patients. Steripath and Mission to Zero have provided such an opportunity. Our biggest, silent threat in Infection Prevention is multi-drug resistant organisms. By using Steripath, we not only reduce blood culture contamination rates but also decrease antibiotics used as a result of false positive blood cultures. Such a win-win situation!"

Shannon Colleen Jordan, RN, BSN, CIC, *Infection Control Manager*
 Miguel Rivera, BS, CLS, CIC, *Infection Preventionist*
 University Medical Center of El Paso

Mission to ZERO Aims to Reset National Benchmark

Magnolia launches nationwide initiative to raise awareness of patient safety risks caused by false-positive diagnostic results for sepsis. The goal is to drive change by reducing the national blood culture contamination benchmark, while partnering with hospitals in their mission to eliminate blood culture contamination and false positive CLABSI reporting.
