INTREPID™ Series

[Back](#)

INTREPID™ is the brand for premium and semi-premium metal threaded connections for tubing and casing used for the oil and gas industry designed for USA market.

Oil and gas drilling conditions in USA are getting more complex. The amount of directional wells is increasing, resulting in more stringent requirements. Metal threaded connections for pipes used in the oil and gas industry play a key role in the reliable operation of a string.

INTREPID™ is a series of premium and semi-premium connections for seamless metal pipes designed by INTERPIPE™ for oil and gas production in difficult geological environments.

INTREPID™ Series includes

- steel metal pipes according with API requirement

- proprietary Premium and Semi-Premium connections (steel pipes with couplings) designed by INTERPIPE™ for USA market

- threaded couplings for connecting metal pipes

- and full set of accessories

INTREPID™ Field Service & Customer support engineers can provide 24/7 professional training, assistance and supervision to ensure safe and effective running of our products even in the most severe conditions.

INTREPID™ series is sold in the USA exclusively by the company's trade office – North American Interpipe (<https://na.interpipe.biz/>). Please follow by [link](#) for getting full information about INTREPID™ Series.
