SET SERVICES

Installation, Configuration, and Support

Technology on its own doesn't solve problems. People do. Our suite of services ensures you unlock the most value out of your hardware and software investments. Whether you need help installing new systems, integrating data between various software pieces, or better training your team, we're available to help.

Installation and Configuration

Our best-in-class MDMS is the only zero-cost, meter agnostic data management solution in the water utility market.

SET-UP

Data System Integration

The SETflow Customer Information System shares a data platform with the rest of the SET software suite for a complete meter-to-cash offering.

INTEGRATION

Training and Support

Our customer engagement solution helps end-users better manage their water, protect their property, and self-serve on common utility questions.
