

National Board of Perioperative Medicine ^

Perioperative medicine is an evolving field of medicine that addresses the vulnerabilities of increasing age and complexity of patients and the increase in the number of surgical procedures being performed in United States. There is a critical need to standardize the evidence-based care of surgical patients at risk to ensure optimal outcomes.

The National Board of Perioperative Medicine comprises a group of medical professionals who are considered experts in their respective areas of Perioperative Medicine. The aim of the Board is to formulate a perioperative medicine syllabus for use in the training of physicians in perioperative medicine in the United States.

Please contact Melinda Macalino at melinda.macalino@duke.edu or 919-681-6646 with any questions.
