- Dens
- Reading Nooks
- Work
- Dorm Rooms
- Offices
- Home Offices
- Campers
- Work Spaces
- Benches
- Basements
- Garages
- & More!

Introducing Arctic Air™

The compact, eco-friendly personal air cooler that pulls warm air from the room through its evaporative water filter to humidify while it cools! Arctic Air™ cools, humidifies, and cleans the dust particles for better air!

Simple to Use

It's so simple to set up and use - just pour water in the tank, plug it in and enjoy! Arctic Air™ is an evaporative air cooler that allows you to create your own personal climate - you can adjust the digital

Evaporative Air Cooler

To create your own personal climate, you can adjust the digital temperature display to the temperature you like! Once turned on, the 750ml water reservoir produces moist air. It has a quiet, two-speed fan, adjustable air vents, water reservoir and LED light.

How It Works

Arctic Air™ works on power of water evaporation, taking hot and dry air and making it cool and moist — the simplest and most efficient cooling technology. Arctic Air™ is Freon Free and doesn't need any other toxic coolants. It's not just safe to use but eco-friendly! Other AC systems use a lot of power to try and cool an entire house or building, which is very costly! This personal space air cooler actually cools the air around you, where you need it most, while using the size and power consumption of a small fan!

Use it Anywhere

Its sleek compact design fits nicely on your desk, nightstand or coffee table – wherever you need it! It's great for dens, reading nooks, work, dorm rooms, offices, home offices, campers, work spaces, benches, basements, garages and more! It's even convenient for travel!
