

Pluto - Friction Fit

- Very small footprint push pull connector with an elliptical keying feature
- Option to populate **up to 14 pins**
- Circuitry with components are easily added to this connector
- Contacts are rated at 5 amps & 10Ghrz
- Reusable and Disposable options with ETO, Gamma and autoclave safe materials

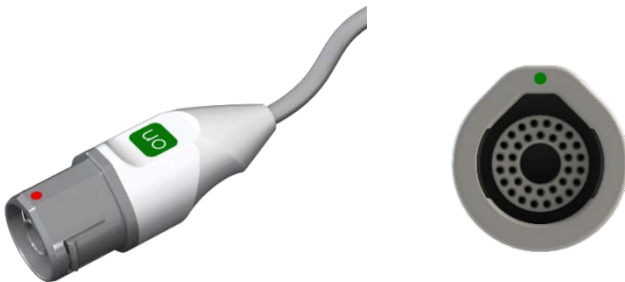

Echo - Magnetic

- Magnetic latching connector with an elliptical keying feature
- Option to populate **up to 20 pins**
- Circuitry with components are easily added to this connector
- Contacts are rated to 5 amps & 10Ghrz
- Reusable and Disposable options available with ETO, Gamma and autoclave safe materials

Rho - Magnetic

- Magnetic latching connector with an elliptical keying feature
- Option to populate **up to 16 pins**
- Circuitry with components are easily added to this connector
- Contacts are rated to 3 amps & 10Ghrz
- Reusable and Disposable options available with ETO, Gamma and autoclave safe materials

Apollo - Latching

- Snap latch connector, with elliptical keying feature.
- Option to populate **up to 34 pins**
- Circuitry with components are easily added to this connector
- Contacts are rated to 5 amps & 10Ghrz
- Reusable and Disposable options available with ETO, Gamma and autoclave safe materials

Neutrino - Friction Fit

- Micro scale connector with large capacity in both power and bandwidth
- Option to populate **up to 12 pins**
- Contacts rated at 3 amps & 10Ghrz
- Circuitry with components are easily added to this connector
- Reusable and Disposable options with ETO, Gamma and autoclave safe materials

Juno - Push-pull

- Ultra high density connector with a large capacity in both power and bandwidth
- Option to populate **up to 146 pins**
- Circuitry with components are easily added to this connector
- Contacts are rated to 5 amps & 10Ghrz
- Reusable and Disposable options available with ETO, Gamma and autoclave safe materials

We give connected electronics muscles, giving them the sex appeal they've been craving. Now for example, OEM's get lost in the sea of expensive, low tech "wimpy" electronic connected solutions.

Our decades of success stories for OEM's allows those who break free from the "wimpy" to prosper with our lower costs solution. Solutions that are scalable to the OEM's growing electronic device demands. Getting their product to market faster, all with the added benefits of increasing the end users experience. Our turnkey solutions puts OEM's lightyears ahead of their competition.

We understand not all OEM's like to lead their industry, and are happy with the expensive "wimpy" but the market leaders, come to Onanon for their muscles!
