### Falcon™

**\$2000 Rugged Illuminated Rifle Scope**

The Falcon™ is an absolute necessity if you are a rifleman who shoots targets at long range with exotic ammo or custom handloads. The Falcon is specifically designed for extremely heavy recoiling rifles. The solid-steel tube allows you to really clamp down on the scope without adverse effects to the parallax mechanism. The scope and Horus reticle combination allows you to unleash the accurate long-range potential of your rifle and ammo. Simply stated: the Falcon makes target and game shooting easy. Horus helps reduce sighting and holdover errors to hit targets at any range.

We spared no effort for our toughest scope. Our steel Falcon has never failed in duty, and we are very proud of that record. Independent optical tests show that the Falcon performs right alongside the highest quality scopes on the market, in terms of light transmission and distortion-free clarity, at almost half the price.

**Reticles: Choice of TRAMAC2, H19, H25, H37**

The TRAMAC2 features angle-tilt ranging to drop compensation and lighting-tilt windage adjustments (new Wind-Off Calculator demo). The H19 offers an uncluttered grid with built-in Accuracy 1st - Speed Shooting Formula plus lead markers for moving targets. The H25 is an excellent all-around reticle for general use. All four reticles have rheostat control illumination for bright conditions. The H37 is for extreme-range shooters; its central targeting grid is 4 mils higher in the field of view allowing more grid to be used at increased magnification. View full reticle specs below.
