### CATS™ Targets

**Calibration And Training System**  
 The bullet didn't hit the mark at 200 yards even with correct come-up and wind values. You must've missed. After all, the rifle and scope were zeroed, right? Maybe not. The scope and rifle could be mounted, meeting at a single point, but misaligned everywhere else. Or internal mechanisms could be a hair off at zero, compounding as you click farther up. Your scope might not be perfectly aligned directly above your rifle barrel, causing cant. Shooting long range exaggerates the slightest flaws. CATS™ is a simple, inexpensive way to reveal and remove those flaws.

Extreme-range shooters will love CATS™ targets for training. Designed to be used at 100 yards, they perfectly replicate a 1000 yard range. Use with Horus' ASU™ for unparalleled accuracy training.

**\$25\* 0303E - five targets\*\* BUY**

**\$25\* 0403E - five targets\*\* BUY**

**\$25\* 8003D - five targets\*\* BUY**

**\$50\* 0280F - five targets\*\* BUY**

\*An \$8 handling fee will be charged for the purchase of each five-target CATS bundle. This handling fee is in addition to shipping. For example, purchasing one bundle will add an \$8 handling fee to your order, purchasing two bundles will add a \$16 handling fee to your order.

\*\*CATS Targets are only sold in quantities of five. Not sold separately.
