Networking
with Certainty℠

Our network solutions leverage the **Sprint-exclusive Certainty network design model,** an intelligent approach to multi-layer network diversity created to provide maximum network availability and application performance.

Certainty offers the choice and flexibility to deliver dynamic network solutions for dynamic digital businesses. Need to support global scale, distributed applications, compute at the edge, the core and everywhere in between?

Let us design a network solution that gives you the peak performance to meet skyrocketing application demands at your headquarters or in remote locations worldwide.

Wireline Network Reliability

Our wireline network continues to perform within all SLAs. We have ample capacity to absorb additional traffic. We are openly sharing our global backbone performance real-time at **IP Network Performance**. For the full update on our dedication to maintaining wireline services, see our **Response to Covid-19**.

VPN services
Get secure, reliable communications for your business.

SD-WAN
Cloud-based apps, mobile, BYOD, IoT: New connectivity demands are complicating the WAN environment. Our managed software-defined WAN solutions make it all much simpler.

View solution

Global MPLS
High-performance, global reachability, and secure multiservice connectivity — get scalable and secure MPLS VPN service across our wholly owned and managed global network.

View solution

Carrier Ethernet
Our Carrier Ethernet Services deliver peak performance to connect all your corporate locations over a congestion-free network at a competitive flat-rate price.

View solution

Dedicated internet
Our dedicated internet service is designed to support your most bandwidth-intensive applications, scaling on demand so you always have reliable, consistent network performance.

View solution

National broadband
Our national broadband internet service is an affordable high-speed transport alternative for your WAN that connects your locations to the internet over DSL, cable or fiber broadband.

View solution

Ethernet access
Get flexible access options for your network, delivering more bandwidth for cloud and real-time applications at a lower cost.

Managed network

Count on our award-winning managed network services to keep your network running smoothly.

View solution

Cloud networking

Accelerate innovation and make the first move to market with our cloud networking.

View solution

Business Wi-Fi

Get reliable, commercial-grade Wi-Fi that performs under load — without upfront costs or demands on your IT department.

View solution

Sprint DataLink

Get an effective back-up strategy to minimize downtime and make sure your day-to-day operations stay up and running when an outage or disaster strikes.

View solution

Wave Service

A superior optical network solution that meets your demands for an economical solution delivering a large, dedicated broadband service that is secure, reliable and scalable.
