MADE IN THE  
**USA**

# The American Recovery starts here and now.

We are United Sewing Automation, Inc, "USA." We manufacture the highest quality PPE face masks on the market, and we make them right here in the USA. While our competitors make lower quality masks and ship them from overseas, our masks use the highest grade materials, pass the most rigorous tests, and meet or exceed the most exacting U.S. standards. These are, quite frankly, among the highest quality masks on the market. Made in America... for America.

## Proudly Manufactured in Mount Airy, NC.

United Sewing is a Berry Amendment Compliant manufacturing facility that is located on Andy Griffith Parkway in the foothills of the Blue Ridge Mountains in Mount Airy, North Carolina. Textiles and apparel have been the cornerstone of manufacturing in Mount Airy for over 100 years. We are proud to bring manufacturing back to the town, and we are proud to be a part of the great American recovery, both from COVID-19 and from the decline in American manufacturing over the past several decades. By choosing United Sewing Automation, you're supporting the American way of life.

North Carolina**

## Protection for the People, by the People.

Our masks are ideal for essential service workers: health care providers, transportation operators, public sector employees, and all front-line warriors. Because we're all in this fight together, and because essential workers are our neighbors, our friends, and our family members, USA produces the same high quality masks for the general public.

# “Sewing” the seeds of America’s recovery.

## Getting Americans safely back to work

**PROUDLY MADE IN AMERICA** with high quality, 100% American-sourced materials, our face masks are surgical grade and ideal for use in hospitals and medical offices, on public transportation, in schools, by all front-line workers, and in daily use by all Americans.

## American Made. America Strong. Keeping Americans Safe.

### THREE LAYERS OF PROTECTION

Constructed of high-quality ultra-soft breathable non-woven fabrics, each mask provides three-ply protection: 1) Leak proof liquid barrier 2) Filter layer stops airborne particulates and 3) Ultra-soft skin-contact layer for comfort.

### DAILY DEFENSE

This single-use disposable mask is designed to prevent the spread of airborne particulates and liquid droplets. It also filters out pollen, dust and other debris in the air.

### ALL-DAY COMFORT

The 3-D design with built-in adjustable nose bridge provides a better fit. Elastic ear loop straps reduce friction on ears and the pleated design provides ample coverage for adults of all sizes.

**MANUFACTURED IN MOUNT AIRY, NC.**

# 3 Ply Non-Woven Disposable Face Masks

Built in nose piece for better fit

Ultra-soft three-ply material

Comfortable elastic ear loop

**Fluid Resistant | Hypoallergenic | Latex Free**

## RAW MATERIALS SOURCED DOMESTICALLY

Georgia

North Carolina

Connecticut

Indiana

# Reviews

These masks are awesome! Made in the USA & even better, manufactured in Mount Airy, NC.. my hometown! The quality of the mask is much better than any of the imported ones I've gotten my hands on. No popped off ear loops or loose fabric. Very happy to have found such high-grade masks during this time, it's even better they're made in the USA!

- Rod Tucker

I ordered these masks since they were made in the U.S and they did not disappoint! High quality stuff! They don't snap like all the other ones do. Shipped quick, very happy.

- Tim Desmond

# Testing Results

## ASTM Level 3 Mask

1. BFE - Bacterial Filtration Efficiency  
RATED OVER **99%**
2. PFE - Particulate Filtration Efficiency  
RATED OVER **99%**
