

## Web Filter

Protect students with CIPA-compliant, safe access to the Web. You get flexible policies, SSL inspection, cross-platform mobile filtering on and off the network, and infinite scalability. And there's no over-blocking thanks to school-specific features, a teacher dashboard, and a Campus Library of safe content.

## Mobile Manager

Manage device policies and apps with ease. Control features, push and lock users into apps, geo-locate lost devices, and report on use and inventory with policies for groups, individuals, and on- and off-campus use. Made for schools, Mobile Manager offers IT-managed policies balanced with classroom controls.

## Classroom Orchestrator

Know what your students are up to. Classroom Orchestrator gives you a dashboard of student screens so you can keep them engaged, spot off-task students, and send quick messages. This cloud-based solution with a dynamic refresh rate won't slow down your network or use all your bandwidth.

## Relay for Chrome

Get the insights you need to understand and maximize use of the devices, keep users safe, and increase the educational return on your technology investments. Relay has everything you need to make decisions to enhance technology use, report up to administrators, present to the board, reassure concerned parents, empower teachers, and direct students on appropriate use.

## Bundle for Windows

Save time with centralized control and delegated administration. The Bundle for Windows offers a unique solution that gives IT centralized control while saving time with delegated management, personalized dashboards, and one-click policies. Integration with Windows OS simplifies your roll-out and your day to day management.
