Smart Play

For many schools, controlling YouTube access for K-12 is a major challenge. Until now, schools had limited choices: allow all videos, block all videos, create time-consuming lists of blocked or allowed content, or rely on YouTube Restricted Mode. **Lightspeed Systems Smart Play** is your answer to safely allowing YouTube access for students in simple-to-use interface with 65 million (and growing) valuable education videos curated by the Lightspeed Systems machine-learning AI database.

Available on Relay, Smart Play is built for K-12 and is the best solution for allowing student YouTube access.

Smart Play
by Lightspeed Systems

✓ Allow appropriate access to educational videos

✓ Allow access to teacher and district channels

✓ Customize access by group, day & time, on- and -off campus and more

✓ 90 million videos (and counting) allowed for students

✓ Runs on Lightspeed Systems machine-learning AI database

✓ Designed and configured specifically for K-12

✓ Embedded YouTube videos around the web get categorized and allowed or blocked by Smart Play

✓ Detailed reporting of all YouTube activity

✓ Students can browse YouTube.com safely

✓ Thumbnail images also removed for blocked videos
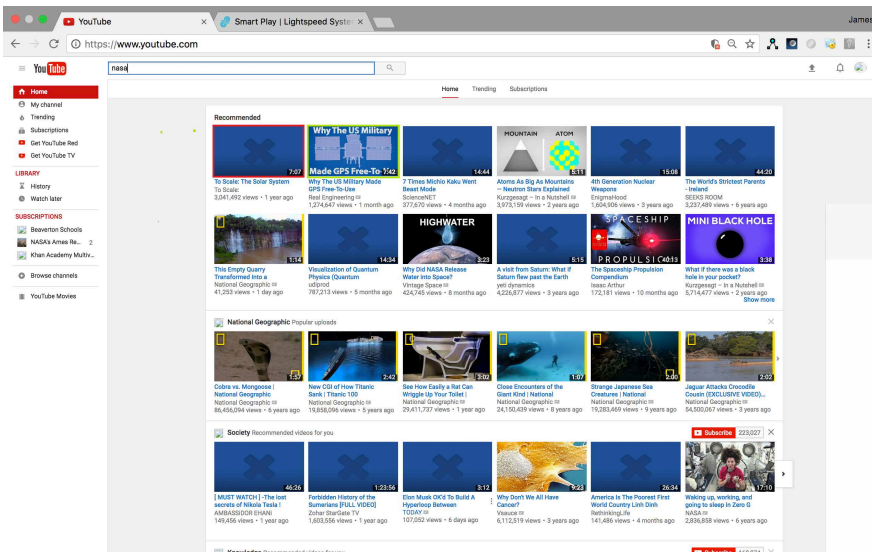

✓ Enabled in just one click

**Save time** – With Smart Play, there is no need to maintain manual lists.

Improve learning – No blocking education videos; no frustrating users as they try to teach and learn.

Maintain safety and acceptable use – You don't need to open all of YouTube to get the best content for K-12.
