

# welcome home

Here at Beam, we're on a mission to make construction better for everyone. Our smart software and industry experts make your remodeling experience a breeze. Let's make it happen!

## HOW IT WORKS

### Your one-stop-shop for construction & renovation.

#### Preliminary Plan

The key to success is having a solid plan and construction is never one-size-fits-all. We create a custom preliminary project plan to kickoff your project and get you started on the right foot.

#### Smart Software

Beam keeps track of all your project details, allows you to shop for materials and fixtures, and ensures that you and your contractor are always on the same page, at every phase.

#### Vetted Contractors

We confirm licenses, insurance, and personally interview every contractor in our network to guarantee our values, align and that we have the best possible understanding of their abilities.

Start a Project

## WHAT IS A PRELIMINARY PLAN?

### Bring your dreams to life with a good plan.

Take the first step towards realizing your renovation dream with a custom Beam Preliminary Project Plan. After an initial consultation, our team creates a custom plan with everything you need to get started.

## Past Projects

Our team and technology make it possible to run projects of all sizes, anywhere in the country.

Catskills Cabin

Hidden Treehouse

Mid-Century Dream

### CATSKILLS, NY

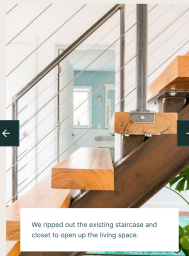

"We took a livable but dated space and transformed it into the perfect escape."

After frequent weekend trips from Brooklyn to the Catskills these Beam clients purchased a small cottage and transformed it into their dream weekend getaway destination.

Scope • 1,200 ft.<sup>2</sup> full renovation including Kitchen, Bathroom, Living Spaces, and Staircase

Budget • Contact Us

Timeline • 4 months

We ripped out the existing staircase and closet to open up the living space.

## Values that build trust.

Trust is the most important part of any successful relationship and we understand the need for total peace of mind while renovating your home. Our values help us build trust for both homeowners and contractors.

### Ask (the right) Questions

Every project is unique and it's essential to ask the right questions, often to ensure there are no surprises or miscommunications. We believe in clear, transparent communication always.

### Quality

With our eye and experience — and really just who we are, quality can't ever be compromised. This goes for the work, materials, and customer service.

### Work Smarter

It's not our first rodeo; you get the advantage of our hard-won knowledge, tried-and-true best practices, and our commitment to the process. This allows our contractors to do what they do best — build.

### Aim for Magic

There is nothing quite like the magic of your own home. We are here to help you build a space made for making memories and more magic.

## Not sure where to start? We got you.

Our **Home Renovation Guide** is packed with all the information you're looking for. We walk you through the details of a real project, show you before and after photos, and provide a worksheet to bring your ideas to life.
