STREAMING®
BASICS

to device (SOFLAM) for powering

to Warrior Pak® 30v Personal AC Charger

to Warrior Pak® Power Station

P/N WP YK-02

STREAMING® power means that the user can charge and discharge simultaneously.

The Warrior Pak® battery system is unique in its simple design. It lets the user *stream* in the field without bulky and complicated power management devices.

This breakthrough is possible because of the proprietary Warrior Pak® Battery Manager on board each system.

In the field this means lower weight, greater reliability and more operational flexibility.
