

ABOUT

Our promise, right from the start:  
**We'll keep your line moving, no matter what.**

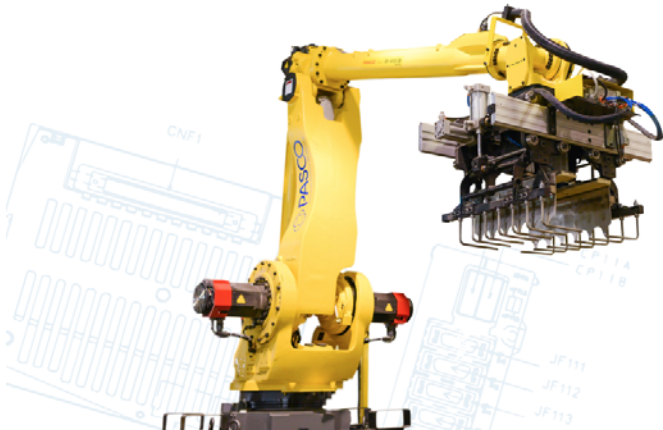

Far too many "about" pages ignore the most important component in the entire operation: You. The customer.

*That's not the PASCO way.*

Every automation system we design and build is custom. When we build a system, we bring together just the right components, and integrate seamlessly with your people, processes, and practices. All to improve efficiency, profitability, and safety.

RELAX, IT'S A PASCO  
WATCH NOW

Simply put, our system will do its job, so you can do yours.

That's our promise to you, and the strength behind the phrase, "Relax, it's a PASCO."

It's an approach we've taken in our family-owned and operated company since 1976. Call us with your packaging automation questions, and we promise that you'll talk to someone who can solve even your most complex packaging problems.

HERE'S HOW WE DO IT:

WE'RE TRUSTED.

For over 40 years, the world's most demanding corporations have counted on us to keep their packaging lines working, day in and day out.

WE'RE CONSULTATIVE.

There's no one-size-fits-all solution; we work with you to design a system that solves your unique challenges.

WE'RE EXPERIENCED.

We have a rich history of solving complex packaging challenges, even in harsh, high-speed environments. This is why nearly 70% of our business is from repeat customers.

WE'RE BOLD.

Our team will craft unexpected solutions, all driven by our Relentless Pursuit of Better.

PASCO met and exceeded our expectations. We had a particularly small space to work in and they custom fit a solution.
