

# CoolerFRESH FILTERS™

- ✓ Quality Assurance
- ✓ Risk Management
- ✓ Preventative Maintenance

CoolerFRESH FILTERS™ consist of a custom made woven cloth with a blend of all natural zeolite minerals and activated charcoal designed to keep walk-in and reach-in commercial refrigerators dry and safer for food storage while also saving energy and improving operational efficiency.

With CoolerFRESH FILTERS™

## ☞ Refrigerators stay **COLDER**

- Average 2-5 degree drop in temperature
- Colder and drier means a safer food storage environment

## ☞ Food is kept **FRESHER & LONGER**

- Less food wasted use more of what you buy
- Fresher food served

## ☞ **ODOR** is controlled

- Reduces food to food odor contamination

## ☞ Floors, shelves & all surfaces stay

### **DRIER**

- Controls rust & mold growth
- Less risk of slip and fall accidents
- Reduces worker's comp. claims

## ☞ Refrigerators run less and work more **EFFICIENTLY**

- Colder temperatures and less humidity reduces run time and workload
- Longer equipment life with less breakdowns
- Controls harmful gases that destroy evaporator coils & cause food to ripen prematurely
- Energy Savings-Average 10% reduction of compress or run time and Kilowatt Hour Demand

CoolerFRESH FILTERS™ = **SYSTEM WIDE SAVINGS**

Dimensions: 10" X 10" X 2 1/2"

- ✓ Less Food Wasted
- ✓ Energy Savings
- ✓ Longer Equipment Life
- ✓ Safer Work Environment
