

Free-Space Optical Laser Communications Solutions

OPTICAL INTER-SATELLITE
AND DIRECT-TO-EARTH LINKS

CACI's advances in free-space optical (FSO) laser communications technology are improving the speed, efficiency, reliability, and security of many of the U.S. Government's most critical missions. CACI has been successfully delivering FSO optical communication solutions to the U.S. Government for more than 20 years.

Our FSO solutions are inherently low probability of intercept (LPI) and low probability of detection (LPD) and enable secure communications in radio frequency (RF) denied or restricted environments. RF communications can be effectively jammed by an adversary, but FSO technology's focused point-to-point nature makes jamming virtually impossible.

Optical carrier frequencies are 10,000 higher than RF communications, translating into higher throughput performance. Our FSO communication solutions include High-Power Optical Amplifiers (HPOAs), optical modems, and full laser communications terminals for reduced size, weight, and power (SWaP) compared to RF.

A *Fortune* World's Most Admired Company

EXPERTISE AND TECHNOLOGY FOR NATIONAL SECURITY

CACI
EVER VIGILANT

Benefits

- High-performance throughput for terrestrial, airborne, and space environments
- Ultra-low SWaP compared to RF technologies
- Highly secure, LPI/LPD communications
- Enable communications in an RF-denied environment
- Optical spectrum for communications is effectively unlimited, while RF spectrum is limited

Free-Space Optical Communications Expertise and Technology

CACI's free-space optical communications (FSOC) experts have performed extensive work on low SWaP Optical Inter-Satellite Link (OISL) terminals, beginning with our work for a U.S. Government customer on an ultra-low SWaP terminal known as the Compact Intersatellite Communications and Data Link (CICADA™). Two CICADA variants are now available for customers – CICADA Ultra-Lite and CICADA Enhanced (E-1G) – and a pair of CICADA Ultra-Lite flight terminals have been delivered to a U.S. Government customer.

CACI is also working on extensive contracts with a variety of space-based FSOC customers. We are currently executing three flight programs for the National Aeronautics and Space Administration (NASA), each delivering flight hardware in FY21:

- A laser communications transmitter for the Deep Space Optical Communication (DSOC) mission to the asteroid Psyche
- A bidirectional laser communications modem for the International Space Station as part of the Laser Communications Relay Demonstration (LCRD) Low-Earth Orbit User Modem and Amplifier Terminal (ILLUMA-T) program
- A bidirectional laser communications modem, which will travel on the Artemis II mission with the first astronauts to visit lunar orbit in 50 years, developed with the Optical to Orion (O2O) program

Our FSOC programs are conducted by the multi-disciplinary CACI Photonic Solutions team of physicists and material scientists, along with optical, electrical, and mechanical engineers. This team is focused on developing the most advanced photonics-based solutions, including optical modems, optical terminals, high-power sources for FSOC, as well as conducting research and development of high-power optical sources for remote sensing applications and optical systems for space exploration.

Feature	CICADA Ultra-Lite	CICADA Enhanced (E-1G)
Operating wavelength	850 nm	1550 nm
Weight	3.6 lbs	20 lbs
Bus power draw	14 W	35-40 W @ 1 Gb/s
Stowed volume	3.07 L	9.86 L
Base footprint	5.70 x 5.34"	11.0 x 15.7"
Stowed height	8.23"	11.3"
Field of regard	±70° in azimuth and elevation	±65° in azimuth and elevation
Tracking speed	Up to 3°/second	Up to 3°/second
Datacom link	Full-duplex	Full-duplex
Data rate	150 Mb/s @ 2000 km	1-10 Gb/s (configurable) @ 5000 km
Data rate	75 Mb/s @ 4000 km	100 Mb/s @ 84,000 km

EXPERTISE AND TECHNOLOGY
FOR NATIONAL SECURITY

CACI's approximately 23,000 talented employees are vigilant in providing the unique expertise and distinctive technology that address our customers' greatest enterprise and mission challenges. Our culture of good character, innovation, and excellence drives our success and earns us recognition as a *Fortune* World's Most Admired Company. As a member of the *Fortune* 1000 Largest Companies, the Russell 1000 Index, and the S&P MidCap 400 Index, we consistently deliver strong shareholder value. Visit us at www.caci.com.
