

IRAD - Integrated Reservoir Analytics Database

Evaluate Potential Assets in Minutes.

Subscriptions starting as low as \$500/month

What is IRAD?

IRAD is a web based platform that contains all of the NUTECH Regional Studies in one place for quick access to thousands of wells and maps. IRAD capabilities add ease and functionality into any workflow by providing access to formation top picks, Petrophysical Evaluations, GeoMechanical Evaluations, grids, and the ability to create customized cross sections without needing costly software.

IRAD Testimonials

"IRAD seems like a significant pivot for NUTECH. Kudos to creating something that is extremely useful. This is exactly what the market needs."

- Acacia Exploration Partners

"This is something the industry has needed for a long time. We are anxious to start using it."

- Triple Crown Energy

"Very visually appealing and very user friendly. Smart move for NUTECH. Makes your services more applicable, affordable, and worthwhile to more companies than in the past."

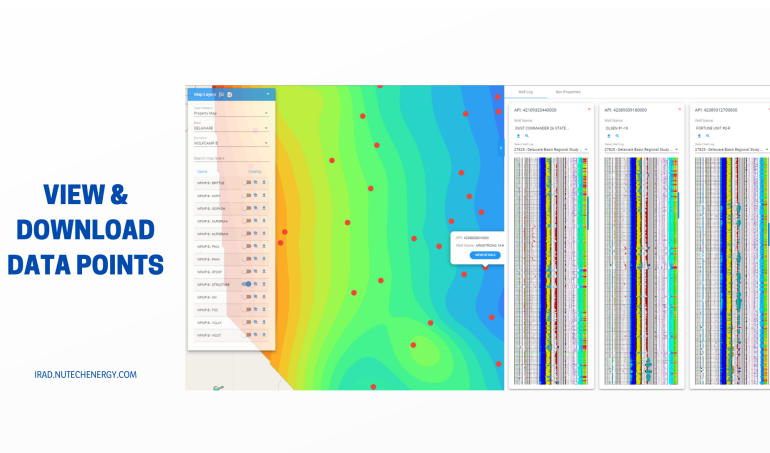

- Brice Otto, DoublePoint Energy

"This will certainly make my job easier when it comes to dealing with other log and data sites."

- Michael Rafael, MDM Permian

Well Comparison

- › Select wells to do a side by side comparison
