Mac

Create gorgeous spreadsheets with Numbers for Mac. Get started with one of many Apple-designed templates for your home budget, checklist, invoice, mortgage calculator, and more. Add tables, charts, text, and images anywhere on the free-form canvas. As soon as you start typing a formula, you'll get instant suggestions and built-in help for the over 250 powerful functions. Animate your data with new interactive column, bar, scatter, and bubble charts. Easily filter through large tables. Automatically format cells based on numbers, text, dates, and durations with new conditional highlighting. And with an all-new calculation engine, Numbers is faster than ever before.

With iCloud built in, your spreadsheets are kept up to date across all your devices. And with real-time collaboration, your team will be able to work together at the same time on a Mac, iPad, iPhone, or iPod touch — even on a PC using iWork for iCloud.

Collaborate with others at the same time

- With real-time collaboration, your whole team can work together on a spreadsheet at the same time
- Collaboration is built right in to Numbers on the Mac, iPad, iPhone and iPod touch
- PC users can collaborate too, using Numbers for iCloud
- Share your document publicly or with specific people
- You can easily see who's currently in the document with you
