Mac

Easily create gorgeous presentations with Keynote, featuring powerful yet easy-to-use tools and dazzling effects that will make you a very hard act to follow.

The Theme Chooser lets you skim through an impressive collection of 30 new and updated Apple-designed themes. Once you've chosen the perfect canvas for your presentation, simply replace the placeholder text and graphics with your own words and images. Easy-to-use tools let you add tables, charts, shapes, photos, and videos to slides—and bring it all to life with cinematic animations and transitions that look as though they were created by your own special effects team. Use Keynote Live to present a slideshow that viewers can follow from their Mac, iPad, iPhone, iPod touch, and from iCloud.com.

With iCloud built in, your presentations are kept up to date across all your devices. And with real-time collaboration, your team will be able to work together at the same time on a Mac, iPad, iPhone, or iPod touch — even on a PC using iWork for iCloud.

With Keynote, you have all the tools you need to make an amazing presentation quickly and easily.

- Collaborate with others at the same time
- With real-time collaboration, your whole team can work together on a presentation at the same time
