Clean Means Business

As a business owner, you are not alone in navigating how to best reopen your doors, and we recognize health and safety is your top priority. To help you and your community navigate this complex time, we've created the Healthy Returns toolkit offering guidance, adapted from public health recommendations, to ensure a safe and successful reopening, as well as to reinforce confidence among your teams and customers through effective cleaning and disinfecting best practices.

Healthy Returns Resources

The Healthy Returns toolkit includes resources designed for businesses to deploy in their workplace to help guide efforts and communicate the importance of safety and health as a priority and solution for successful reopening. All materials align with key public health guidelines with an added emphasis on hygiene and disinfecting protocols.
