TOGU® Challenge Disc 2.0

- Use to measure and improve balancing and coordination skills
- Every move on the Challenge Disc is measured by an integrated motion sensor and results are displayed within the Challenge Disc APP using Bluetooth 4.0 technology
- Challenge Disc APP is a free download available on desktop, tablet or mobile devices (Windows, Mac, Android, and iOS)
- Use the APP with the disc to perform selective exercises systematically, efficiently and in a targeted manner
- Ideal for therapists, patients, trainers, athletes, and fitness enthusiasts of all performance levels and ages

30-4930 TOGU® Challenge Disc 2.0 350.00

Baseline® BIMS™ digital (Load-Cell) 5-position dynamometers

- Adjustable 5-position handle fits all size hands
- Accurate and repeatable grip and pinch strength measurements
- Purchase the dynamometer that meets your practice needs: **functional, clinic** or **deluxe**
- Subject/Test information can be inputted at time of test: dominant hand, handle position, exertion/rest times, units (lb/kg)
- 3 piece hand set includes grip and pinch dynamometers, plastic finger goniometer (12-1014) and carry case
- Bluetooth enabled to accept future APPs

2
year
warranty

Test protocols

- **Live Test:** Shows real time and maximum value. Test result is not stored
- **Quick Test:** Shows real time and maximum value. Maximum is stored
- **GST (General Strength Test):** 3 tests are performed at the same handle position. Peak, mean, SD, and COV are stored
- **RET (Rapid Exchange Test):** 6 tests (alternating hands) are performed at the same handle position
- **MMVE (Modified Maximum Voluntary Effort Test):** 5 tests are performed; 1 at each handle position
- **MVE (Maximum Voluntary Effort Test):** 15 tests are performed per hand; 3 at each handle position
- **Fatigue (Work Test):** 1 extended time test is performed. Results can be used to compare strength exerted (total work performed) over 2 or more user defined time periods

Functional model

- Shows strength readings in real time. Holds maximum value until reset. Includes **Live test**

Clinic model

- Ideal for the hands-on practitioner. Shows results in real time and stores subject/test information and test results for recall. Includes **Live, Quick, and GST tests.**

Deluxe model

- Ideal for Workers Comp, FCE (Functional Capacity Evaluation), research application and day-to-day testing. Shows results in real time and stores subject/test information and test results for recall. Includes **Live, Quick, GST, RET, MMVE, MVE, and Fatigue tests**
