THINBIT
Introducing
**Heavy Duty Round Reversible
 Toolholder**

THINBIT™, manufactured by Komet Tool Company, Inc. introduces a new toolholder design that offers advantages of the full line of inserts for turning, broaching, hole grinding and custom applications. The heavy duty round reversible toolholder provides an insert seated in the center of the thread and can be used in either left or right hand. Compatible with CNC, Swiss and conventional machines, this design improves rigidity and improves cutting performance. Inserts are available in standard standard and metric sizes.
