

Our Why

Our Why is Our Mission

why we DO what we DO

Our companies primary mission is to help our customers create a world that unleashes emerging technologies that will improve the lives of everyone around the world! The only way that we will complete this mission is to leverage an untapped resource of talent that can only be found in our veteran community. Our industry isn't lacking in genius and intelligence. Our industry is lacking in leadership and courage. We want to create a mutually beneficial partnership between our two companies that helps us transition the best and brightest from the military into the mission critical vertical as we believe that our fellow veterans can bring the same discipline and integrity to serving the data center industry as they once brought to serving our country while in uniform.

In the end, our *why* drives our *what*, and we believe our services are 100% focused on how they benefit the customer first, not the company, and our success will be measured by how much our employees and our customers invest their time and money in staying with us.

"As the Managing Partner it is my mission to build an organization that can survive long after I leave by creating a culture that encourages safety and personal growth." – Kirk Offel

How Can We Help?

Whether you are an organization in need of representation or consultation, or seeking to be a part of the OVERWATCH Team, we want to hear from you.

We are here when the mission is critical.
