@Leila can you send me the project tasks please?

@Omeed please find below the task and project document, thanks!

Projects and Tasks.pdf   100%

Thank you, I'll get started on these now.

send and search files, and enable quick responses

Modernize the way you collaborate

Wire offers the most comprehensive collaboration suite featuring messenger, voice, video, conference calls, file-sharing, and external collaboration – all protected by the most secure end-to-end-encryption.

Learn more about Wire's collaboration suite →

Uncompromising security

Wire provides the strongest security for organizations looking to protect their communications and document sharing. End-to-end encryption gives you the confidence to talk, message, and share across teams and with clients, through a single app that's available on all of your devices.

Learn more about Wire's security technology →

Know your odds and win the bet against cybersecurity →

## Transparency is our policy

Wire is 100% open-source and independently audited—with an option to be tested against existing security and governance frameworks.

Built to scale to tens of millions of users, Wire is ISO, CCPA, GDPR, and SOX-ready.

Learn more about our commitment to transparency →

The Future of Enterprise Communication

Wire is actively leading the work on extending its security standards to become the norm for protecting organizations' digital assets.
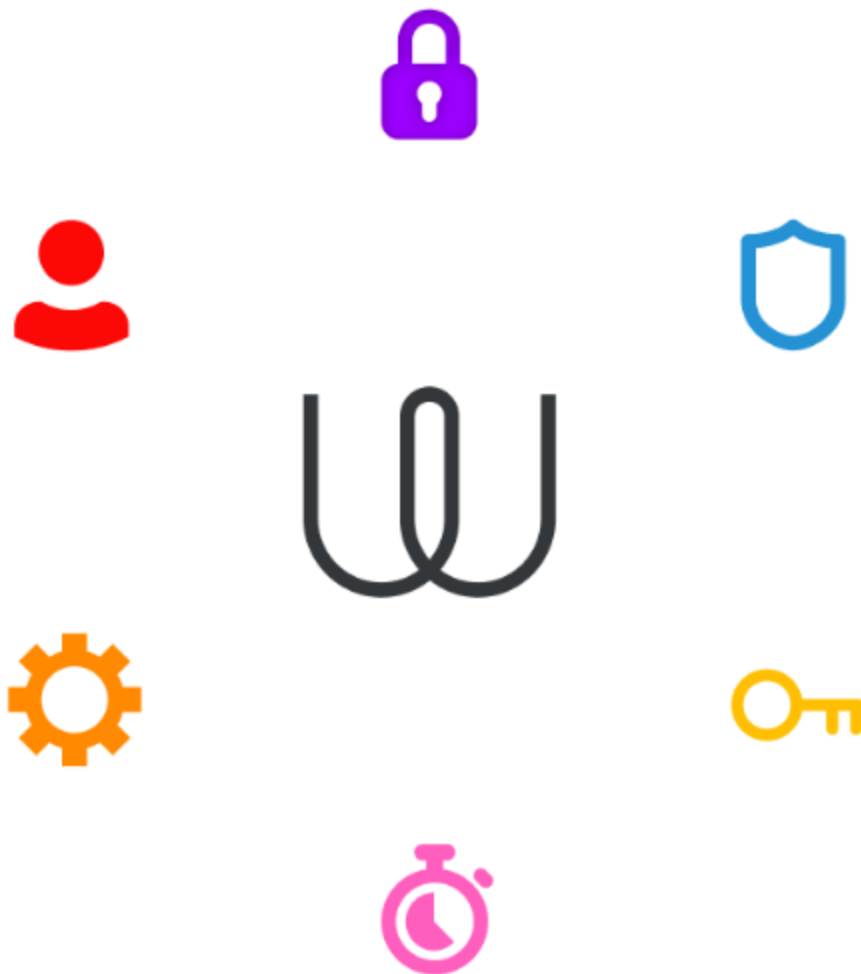

Messaging Layer Security (MLS) is a new protocol designed to firm up the security of enterprise messaging platforms by employing end-to-end encryption within group communication.
