

Specialty Bags and Covers

We can create a bag or cover for any application. Send us a drawing—we'll make it work!

Bags and covers for any application.

Over the last 25 years UniTech has helped design and build hundreds of different types of bags, tarps and covers for customer specific applications. Whether you need to cover a sealand container to protect it from the elements or need a 1" HEPA Port Cover, UniTech can help you design the right cover from the proper material to do the job.

How will UniTech's Specialty Bag Program work for you?

- We can create any bags or covers you need: specify the size, grommets, closures, straps, handles, and other needs.
- Send us a rough drawing, we'll coordinate the rest!
- These specialty products are created with the same nylon fabrics that we use in our popular laundry bag program.
- Need printing to identify the bag or explain its use? All printing is done with gas transfer, alleviating FME concerns and assuring identification is visible throughout the life of the item.

We can create...

- FME covers of all sorts—including super size
- Transformer bags
- Specialty tarps
- Custom lay-flat bags
- Nuclear rotor shipping covers
- Reactor covers
- Covers for Sealand Containers
- Barrier panels

If you can draw it, we can build it. Call your Technical Account Manager today!
