

# AQUASAFE FLOOD BAGS

**Superior Protection Against Indoor Water Damage and Outdoor Flooding**

AquaSafe Flood Bags are designed to prevent water damage to your property. They are made of a special material that is 100% waterproof and will not absorb water. They are also made of a special material that is 100% tear resistant and will not puncture or tear. AquaSafe Flood Bags are made of a special material that is 100% tear resistant and will not puncture or tear. AquaSafe Flood Bags are made of a special material that is 100% tear resistant and will not puncture or tear.

## INSTRUCTIONS: SANDBAG

1. Open the AquaSafe Flood Bag and remove the sandbag.
2. Place the sandbag in the area where water is expected, or in a hole in a basement wall.
3. Fill the sandbag with sand or other granular material.
4. Once the sandbag is full, it will expand and create a barrier against water.
5. AquaSafe Flood Bags are designed for the diversion of water. They are not to be used for anything else.

## INSTRUCTIONS: SUPER ABSORBENT

- Using AquaSafe as a super-absorbent pad, follow the instructions below:
1. Open the AquaSafe Flood Bag and remove the super-absorbent pad.
  2. Place the dry AquaSafe Flood Bag in the area where water is expected, or in a hole in a basement wall.
  3. AquaSafe will absorb the liquid and continue to expand until full.
  4. Once AquaSafe is full and cannot absorb any more liquid, simply pick it up and dispose of it in a trash receptacle. The AquaSafe bag will not drip when transporting.
