## What is SentinelOne's Storyline?

SentinelOne's Deep Visibility empowers you with rapid threat hunting capabilities thanks to our patented Storylines technology. Each autonomous SentinelOne Agent builds a model of its endpoint infrastructure and real-time running behavior. The Storyline ID is an ID given to a group of related events in this model. When you find an abnormal event that seems relevant, use the Storyline ID to quickly find all related processes, files, threads, events and other data with a single query.
