

HOME ▶ SERVICES & SUPPORT ▶ TEST EQUIPMENT

Humanetics provides a full range of services to install, maintain, calibrate, and certify our crash test equipment.

Our aim is to keep your test operations running to the highest certified standards by providing you with our expertise, products, and partnership when you need it.

We can lease test equipment for specific tests or longer periods of time and we can provide regular maintenance and training for in-house teams, or schedule times to deliver one-off programs tailored to your needs. We also provide a full training program to develop the next generation of engineers in your labs, or a fully outsourced solution with our engineers embedded in your teams on a short term or long-term basis.

We provide two key services to support the Dummy Positioning System and Lab certification.
