Poly-Bridge

Ames® Poly-Bridge® is a strong polyester reinforcement fabric perfectly suited for use with Ames coatings. It contributes substantial strength to the coating with minimal show-through or profile. Poly-Bridge is easy to embed into Ames coatings, as the coating will flow through and saturate the material.

Product Description

Poly-Bridge molds and conforms to areas prone to splitting such as flashings, cracks, gaps, vents and seams while creating a 'bridge' that ties surfaces together to prevent water seepage. Ames Poly-Bridge reinforcing fabric is an easy way to maximize strength and seam stability when using Ames coatings. Ames coatings perform best with Ames polyester reinforcement fabric. Please do not substitute fiberglass- or asphalt-impregnated seam tape.

Poly-Bridge is compatible with:

- Ames Elasto-Barrier®
- Blue Max® Tile & Floor
- Blue Max Air Barrier
- Blue Max Liquid Rubber Waterproofer.
